PROFESSIONAL SUMMARY

Detail-oriented **Data Analyst** with hands-on expertise in **Python, SQL, Power BI, and Tableau**. Demonstrated ability to design **ETL pipelines**, perform **exploratory data analysis (EDA)**, and build **machine learning models** (Scikit-learn) to deliver actionable business insights. Proficient in **statistical analysis, data wrangling**, and **KPI dashboard development** for cross-functional stakeholders. Experienced with cloud platforms (**Azure, AWS**) and committed to translating complex datasets into data-driven decisions that improve business outcomes.

TECHNICAL SKILLS

Languages & Querying: Python, SQL, DAX
Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, SciPy, BeautifulSoup
Data Visualization & BI: Power BI, Tableau, Excel (Pivot Tables, VLOOKUP, INDEX-MATCH, Advanced Charts)
Databases: MySQL, MS SQL Server, SQLite
Machine Learning: Regression, Classification, Feature Engineering, Predictive Modeling, Hypothesis Testing

Core Competencies: EDA, Statistical Analysis, ETL Pipeline Design, KPI Reporting, Data Wrangling, Web Scraping, A/B Testing, Business Intelligence (BI), Data Storytelling
Tools & Platforms: Git, GitHub, Jupyter Notebook, Google Colab, VS Code, Microsoft Azure, AWS

PROJECTS

Sales Data Analysis & Business Intelligence Dashboard | Self-Directed | 2024

Tools: Python, SQL, Excel, Power BI, Tableau, Pandas, NumPy, Scikit-learn

- Cleaned and preprocessed 10,000+ sales records using Python (Pandas, NumPy) and SQL; resolved missing values, duplicates, and outliers, improving dataset integrity by ~15%.
- Conducted EDA and statistical analysis to identify revenue trends and customer segmentation — surfacing top 5 products driving 40% of total revenue to support targeted sales strategy.
- Built Power BI and Tableau KPI dashboards tracking sales performance, profit margins, and customer segments, enabling real-time, data-driven decisions for stakeholders.
- Developed Scikit-learn regression model to forecast quarterly revenue; applied feature engineering and communicated insights via data storytelling for non-technical audiences.

Exploratory Data Analysis — Sports Analytics (Cricket) | Self-Directed | 2024

Tools: Python, Pandas, NumPy, Matplotlib, Seaborn, BeautifulSoup, Requests, Power BI

- Performed EDA on 3,000+ cricket match records; identified batting average correlations with match outcomes using Matplotlib and Seaborn.
- Built an ETL pipeline via web scraping (BeautifulSoup/Requests) to automate data collection and load real-world sports data for analysis.
- Applied hypothesis testing and statistical inference to validate trends; developed Power BI dashboards enabling evidence-based player selection decisions.

EDUCATION

B.Sc. — Mathematics, Statistics & Computer Science
Gayatri Vidya Parishad College, Visakhapatnam
CGPA: 89% 2022-2025

Intermediate (MPC) — Sri Chaitanya Junior College
Score: 95%
SSC — Dr. K.K.R's Gowtham E.M. School - Score -92%

CERTIFICATIONS

Analyzing Data with Microsoft Excel — IBM | edX (May 2024 · ID: DA0130)

Skills: Data Analysis, Microsoft Excel, Pivot Tables, Data Visualization, Statistical Analysis, Business Intelligence (BI)

Data Analysis Certification — Innomatics Research Labs

Skills: Python, SQL, Data Cleaning, Data Wrangling, KPI Reporting, Dashboard Creation, Analytical Problem Solving, ETL

Exploratory Data Analysis (EDA) Certification — Innomatics Research Labs

Skills: EDA, Python (Pandas, NumPy, Matplotlib, Seaborn), Statistical Inference, Feature Analysis, Hypothesis Testing
